Notes: pp = percentage point change from prior year rounded to the nearest 1pp, ELL = English Learner, RE = Race/Ethnicity, SWD = students with disability, AA = African American, A = Asian, F = Filipino, L = Latino, ME = Multiple ethnicity, PI = Pacific Islander, W = White, NA =Native American, LI = low income (qualified for free or reduced lunch), ES = elementary school, MS = middle school, HS = high school; School demographics were gathered on California Board of Education Data System (CBEDs) day 2015; N for growth is the N for the prior year of data; N is not shown for Attendance Rate because the denominator there corresponds to total sum of days enrolled for all students across the year for that site rather than the count of students. When the LPRG N for the prior year of data did not meet 20 students, results are suppressed for growth for that indicator. SRI results are from the Spring administration in each year. Status growth is measured as the change in result from one year to the next. Total Score = (total weight received/total weight out of)\*5, rescaled to 1-6; The relative contributions of status and growth for each domain are shown next to the rolled up total scores, rounded to the nearest 1%; the Overall Tier is a value generated from the total weights and rescaled to 1-6; creation date = 10/26/16.

\*Denotes indicators for which results are from 2014-15 rather than 2015-16 due to a one year delay in data reporting.
